KABIR PURI
Data Analyst | Analytics Engineer

Gurugram, HR | +91 8585922935 | kabirpuri02@gmail.com | https://github.com/kabixr| http://www.linkedin.com/in/kabirpuri02

PROFESSIONAL SUMMARY

Data Analyst and Analytics Engineer with hands-on experience in SQL, Python, ETL pipelines, business intelligence, and data-driven decision-making. Skilled in advanced SQL, data transformation, dashboard development, KPI reporting, and statistical analysis, with experience building analytics solutions that improve data quality, operational efficiency, and business visibility.

EDUCATION

Master of Computer Applications (MCA - AI & Machine Learning) 2023 - 2025
Amity University, Noida Grade – 7/10

Bachelor of Computer Applications (BCA) 2020 - 2023
Amity University, Noida Grade – 7/10

Data Science & Machine Learning Program 2026 - 2027
Newton School (Currently Pursuing)

PROFESSIONAL EXPERIENCE

Data Science Virtual Experience August 2026 – September 2026
BCG X Remote - Massachusetts

- Analyzed customer churn and price sensitivity through EDA, data cleaning, feature engineering, and Random Forest modeling using Python.
- Evaluated model performance using cross-validation and ROC-AUC, identified key churn drivers, and translated findings into actionable retention recommendations.

Data Science Virtual Experience July 2026 - August 2026
British Airways Remote - UK

- Developed predictive analytics solution on 50,000+ customer booking records using Python, Pandas, and Scikit-learn to identify likely purchasers.
- Trained a class-balanced Random Forest, achieving 76.7% ROC-AUC through stratified 5-fold cross-validation and translating model insights into customer-targeting strategies.

Business Intelligence Analyst → Senior Business Intelligence Analyst (Freelance) January 2026 – June 2026
Muskan Forever Pvt. Ltd. Gurugram, Haryana

- Led BI and performance analytics, building KPI dashboards and analyzing trends to identify performance gaps and operational opportunities.
- Delivered data-driven recommendations to stakeholders, supporting process optimization, operational efficiency, and business decision-making.

Technical Operations Intern March 2025 - October 2025
Medanta – The Medicity Gurugram, Haryana

- Increased platform adoption by 20% through data-informed UX analysis and user journey mapping; identified and eliminated onboarding friction points.
- Built SQL/Python ETL and BI workflows for 2,000+ records, reducing data-entry errors by 30%, eliminating 95% of redundant records, and accelerating reporting by 20%.

Software Engineering Intern May 2024 - June 2024
J.P. Morgan Chase & Co. Remote, NYC

- Built a real-time stock analytics dashboard processing 1,000+ market data updates/second with millisecond latency, enabling faster access to market signals.
- Developed 10+ reusable ETL frameworks and data pipeline components, improving data quality by 35% and reducing analyst onboarding time by 20% across 50+ team members.

Application Developer Intern June 2021 - July 2021
Brookfield Properties Gurugram, Haryana

- Developed a Java/SQL Library Management System handling 10,000+ records, optimizing queries to reduce response time from 5 seconds to sub-second latency.
- Implemented role-based access control across 5 departments and trained 50+ users, achieving 100% adoption and reducing IT support tickets by 30%.

KEY PROJECTS

Chinook Digital Music Store — SQL Data Analysis – Analyzed 18K+ records across 11 relational tables using MySQL to evaluate sales, customer behavior, churn, CLV, geographic performance, and product affinity.

Zomato Restaurant Market Expansion Analysis – Analyzed 9.5K+ restaurants across 15 countries using Excel and Pivot Tables to evaluate competition, ratings, spending, demand, and international expansion opportunities.

Predictive Analytics Models – Developed regression and classification models using Python, Scikit-learn, and Pandas to forecast customer behavior and predict churn, achieving 85–92% accuracy across evaluated models.

TECHNICAL SKILLS

Programming & Analytics: Python, SQL, Java, JavaScript, Pandas, NumPy, Advanced SQL, CTEs, Joins, Window Functions, EDA, Statistical Analysis, Data Validation
BI, Data Engineering & ML: Power BI, Tableau, Excel, ETL, Data Transformation, Data Quality, Scikit-learn, Predictive Modeling, Feature Engineering, Model Evaluation, Git, AWS, GCP
